INTERNATIONAL SEARCH REPORT

International Application No
PCT/US 01/09126

A. CLASSIFICATION OF SUBJECT MATTER
IPC 7 C12N15/12 C07K14/47 C12Q1/68 C07K16/18 G01N33/68
G01N33/574 //A61P15/08,35/00

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
IPC 7 C07K

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)
BIOSIS, EPO-Internal, WPI Data, PAJ, SEQUENCE SEARCH

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category °	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	DATABASE EBI [Online] Hinxton, UK; 17 March 1999 (1999-03-17) Database accession no. AI494514; XP002188635 See nucleotides 1-277 ---	1-4
X	DATABASE EBI [Online] Hinxton, UK; 3 August 1999 (1999-08-03) Database accession no. AI934649 XP002188636 See nucleotides: 3-274 ---	1-4
A	DATABASE EBI [Online] Hinxton, UK; 14 February 2000 (2000-02-14) ABOLA ET AL.: Database accession no. AC023176 XP002188634 See nucleotides: 37515-37990 --- -/--	1-4

[X] Further documents are listed in the continuation of box C.

[X] Patent family members are listed in annex.

° Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family

INTERNATIONAL SEARCH REPORT

International application No.
PCT/US 01/09126

Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. [X] Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:

Although claims 45, 54-56 are directed to a method of treatment of the human/animal body, the search has been carried out and based on the alleged effects of the compound/composition.

2. [ ] Claims Nos.:
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:

3. [ ] Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

see additional sheet

1. [ ] As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.

2. [ ] As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.

3. [ ] As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:

4. [X] No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

claims 1-66 partly

Remark on Protest

[ ] The additional search fees were accompanied by the applicant's protest.

[ ] No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

Invention 1: Claims 1-66 partly

An isolated nucleic acid molecule comprising the nucleotide sequence shown in SEQ.ID.No. 1 of Table 1; a vector and host comprising said nucleic acid; an isolated peptide encoded by said nucleic acid; an antibody which binds to said polypeptide; a method for producing said polypeptide; a method for detecting said polypeptide or said nucleic acid and their use in the diagnosis and treatment of ovarian cancer and for the screening of compounds which inhibit ovarian cancer.

Inventions 2-15640: Claims 1-66 partly

Idem invention 1, but for SEQ.ID.No. 2 to 15640 respectively, as set forth in Tables 1,2,3, wherein each sequence represents an individual invention, i.e. invention 2 relates to SEQ.ID.No.2,through to invention 15640 representing SEQ.ID.No.15640 based on the numbering given in Table 3.
